- Front-end Frameworks: React, Bootstrap
- Back-end Frameworks: Django, Flask, FastAPI
- Databases: PostgreSQL, MySQL
- Tools & Technologies: Git, REST APIs
- Cloud & Deployment: AWS, CI/CD Pipelines

E-COMMERCE PLATFORM

PROJECT

Developed a full-featured e-commerce platform using Django, React, and PostgreSQL. Implemented user authentication, product management, and order processing. Integrated Stripe API for secure payment processing and improved overall performance by optimizing database queries.

PROJECT **DJANGO E-COMMERCE PLATFORM**

A comprehensive e-commerce platform built with Django, designed to provide a seamless shopping experience. The project includes:

- **Cart Management:** Enables users to add, update, or remove items in their cart, with automatic price calculations and discounts.
 - **Wishlist:** Allows users to save items for future purchases, making it easier to keep track of preferred products.
 - **Payment Gateway Integration:** Integrates secure payment options (e.g., Stripe or PayPal), providing a smooth and secure checkout process.
 - **User Authentication:** Implements a secure login, registration, and password recovery system using Django's authentication framework, ensuring safe user access.
-
